

## T-code OX15 – Define New Company.

### Purpose:

OX15 is used to **create a Company** in SAP. A "Company" in SAP represents the **top-level parent entity or corporate group** — typically used for **consolidated financial reporting** across multiple company codes.

	Detail
 <b>What is a Company?</b>	A <b>parent entity</b> that can have multiple subsidiaries (company codes) under it.
 <b>Use Case</b>	If ABC Group has companies in India, USA, and UK, each country will have a separate <b>company code</b> , but all belong to <b>one parent company</b> (created in OX15).
 <b>Linked With</b>	Company codes are linked to the parent company using <b>T-code OX16</b> .

### Steps in OX15:

1. Go to **T-code OX15**
2. Click on **New Entries**
3. Enter:
  - **Company ID** (e.g., ABCD)
  - **Company Name** (e.g., ABC Global Ltd.)
  - **City, Country, Currency, Language**
4. **Save** the company.

## T-CODE: OX02 – Define Company Code

### Purpose:

OX02 is used to **create a Company Code**, which is the **smallest organizational unit** in SAP for which **a full set of financial statements** (Balance Sheet, P&L) can be created.

	Detail
 <b>What is a Company Code?</b>	A <b>legal entity</b> or <b>subsidiary</b> under the parent company (created in OX15). It is where <b>actual financial transactions</b> (posting, reporting) take place.
 <b>Mandatory for:</b>	All <b>financial accounting processes</b> – G/L, A/P, A/R, Asset Accounting.
 <b>Can be linked to:</b>	A Company (via OX16), Credit Control Area (via OB38), Business Places (via OX03).

### Steps in OX02:

1. Go to **T-code OX02**
2. Click on **New Entries**
3. Enter:
  - **Company Code** (e.g., 1000)
  - **Company Name** (e.g., ABC India Pvt Ltd)
  - **City, Country, Currency, Language**
4. Save the Company Code.

To create new company

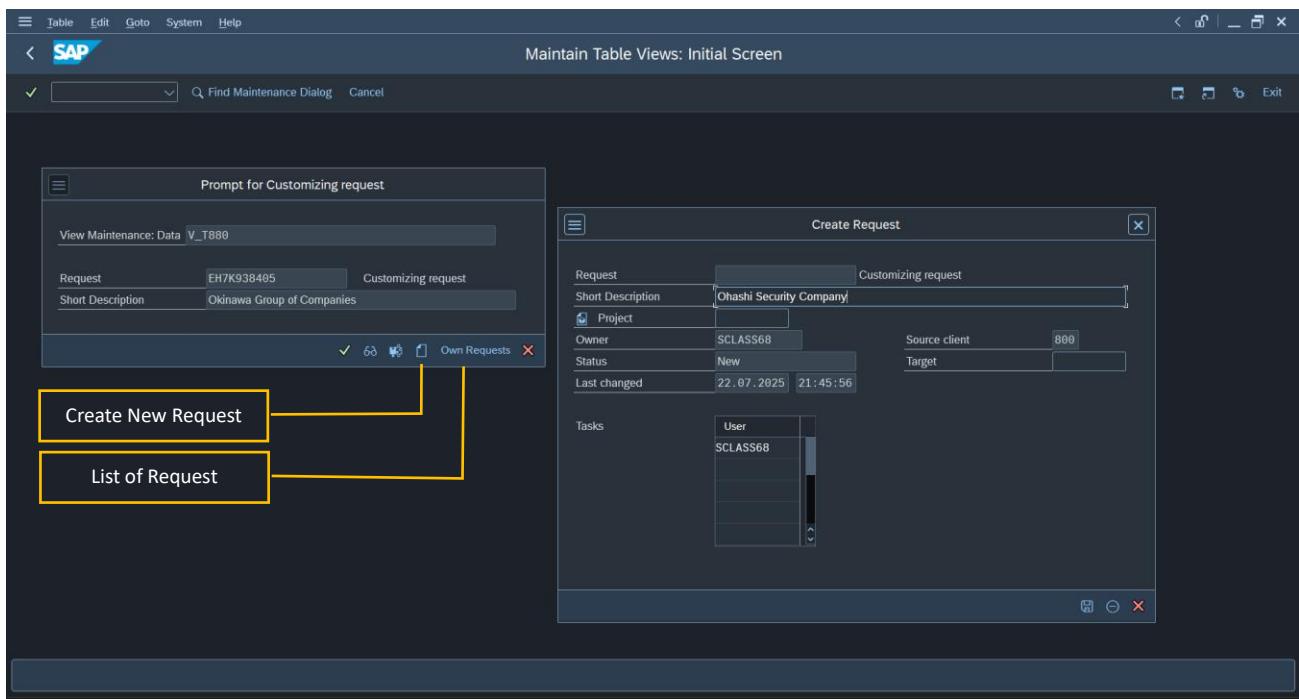

Enter T-Code OX15 – Company Creation.
