## T-CODE: OX16 - Assign Company Code to Company

# Purpose:

OX16 is used to link a Company Code (OX02) to a Company (OX15) — establishing a legal and reporting relationship between the subsidiary and its parent.

What it does:	It's maps each company code (Subsidiary/Legal Unit) to its Parent Company
Required for	Group Level reporting, Legal consideration and SAP validation.
When to Use	After creating entries in OX15 (Company) and OX02 (Company Code).

# **E** Steps in OX16:

- 1. Enter T-code OX16
- 2. Click on New Entries
- 3. Enter:
  - o Company ID (from OX15)
  - o Company Code (from OX02)
- 4. Save

#### Example:

Company (OX15)	Company code (OX02)	Description
ABCD	1000	ABC India Pvt Ltd
ABCD	2000	ABC USA Inc
ABCD	3000	ABC Europe Inc

#### OX15 → ABCD (Parent Company)

 $-0X02 \rightarrow 1000$  (India)

-- OX02 → 2000 (USA)

 $\triangle$  OX02  $\rightarrow$  3000 (Europe)

1

OX16 links all codes to parent

#### Summary:

Purpose: Assign (Linking) one or more Company Codes to a Company

Relationship: Many Company Codes → One Company (Subsidiary Company → Parent Company)

SPRO → Enterprise Structure → Assignment → Financial Accounting → Assign Company Code to Company

### T-Code OX16- Linking branch to parent company.
